RASPBERRIES

BLACK HAWK. Black.

During the long trial tests at Iowa State College, this new berry out-produced all others included in the tests and proved the most resistant to disease. The very large firm shiny berries are just loaded with all the delicious goodness of the black raspberry at its best. The supply is very limited.

6	12	25	50	100
\$2.85	\$5.25	\$9.95	\$18.00	\$32.00

BRISTOL, Black.

For twelve years, the best black raspberry that we have had. The berries are large, firm, glossy jet black and deliciously sweet. Good vigorous growers and excellent producers that succeed over a very wide territory. Our first choice for a home or commercial planting.

CUMBERLAND, Black.

The large sweet berries of this old variety have long made this a ranking favorite. Very dependable heavy bearer.

ALL RASPBERRIES DOUBLY STATE INSPECTED

SEPTEMBER, Red.

Fall Bearing. Having grown this berry for eight years, this berry has surpassed all others with us. Very hardy, a strong grower and a prolific producer. Large to very large, beautiful, luscious, firm red berries, are produced in two crops. The first ripening early in July to August and the second crop coming on in mid-September. Really "tops" for freezing too.

DURHAM, Red.

Everbearer. Canes about three feet tall, vigorous, healthy, hardy and very productive. Berries dark red. Fall crop comes in late August to early September.

INDIAN SUMMER, RED.

A summer and fall bearer that everyone likes. Quite large dark red berries with a truly delicious flavor. Vigorous grower and heavy cropper.

LATHAM, Red.

The most dependable older sort. Large, very tasty, bright red berries.

SODUS, Purple.

What a surprise is in store for those who have never seen or tasted this marvelous berry. A very heavy producer of mammoth, firm berries, sprightly in flavor, resembling the blackcap. Superb for jelly and freezing, very vigorous and productive. Resistant to disease.

If interested in planting larger quantities, write for special commercial prices.

NEW HARDY-CLARK DWARF APPLE TREES!

DEVELOPED BY IOWA STATE COLLEGE, AMES, IOWA

Grown By - **THE WHEELOCK WILSON NURSERY**

We use only the original Hardy Clark dwarfing stock in the production of our dwarf apple trees. This Hardy Clark dwarfing stock, developed at Iowa State College, is grown only on the hardiest root-stock, thus producing trees which are heavily rooted that will grow and produce without bracing as is often necessary with the commonly used apple dwarfing stock.

Our Clark Dwarf apple trees are the only reliably hardy dwarf trees under the severe weather conditions found in the Great Plains area.

With the strong, sturdy roots of our Clark dwarf apple, we recommend deeper planting, at least two or three inches deeper than the trees stood in the nursery. Clark dwarf trees will respond to good

cultural methods. Good soil and good cultivation. Up to $\frac{1}{2}$ pound of Ammonium Nitrate per tree may be used when planting, if placed within the top inch of the soil. Then, with plenty of water during the growing season—just watch them grow.

These trees may be planted as close as 10 or 12 feet. For commercial planting, we suggest 12 by 20 feet.

Clark Dwarf apple trees come into bearing when quite young. The fruit is normal to above normal in size and the color, shape and flavor remain the same for the variety.

HARDY and EASY TO GROW. THEY REQUIRE NO MORE SPACE THAN A LARGE SHRUB.

EACH \$3.50—3 for \$10.00. 10 to 100 trees at \$2.80 each. 100 or more at \$2.65.

➤ **AUTUMN STRAWBERRY.** A very tasty, older red variety, which ripens in September.

➤ **BEACON.** Here is a really good eating apple that ripens in mid-August. A beautiful red that is a delight to youngsters and very fine for cooking. Very hardy.

➤ **CHENANGO.** A very beautiful older apple that is a rare treat for eating in late August and September.

➤ **CORTLAND.** Ready September through early winter. Red. The snow white flesh is mild, crisp and juicy—so satisfying. Very hardy.

➤ **CRANDALL.** A new kind from the Illinois Exp. Station. Red, juicy, firm and crisp. Ripens early October and keeps so well in storage. Threatens to become a rival of the great Jonathan. Promising commercially. Rome Beauty X Jonathan cross.

➤ **DELICIOUS,** Solid red. America's King of Apples. For crisp, juicy sheer goodness, grow and enjoy Solid Red DELICIOUS.

➤ **DELICIOUS, YELLOW.** A great producer and famous for its mild and tantalizing flavor.

➤ **FIRESIDE.** A very hardy variety from Minnesota. Choice for eating. A late red apple that keeps well in winter.

➤ **GRIMES GOLDEN.** A grand old apple, with such a spicy, tasty goodness that it is never forgotten, once tasted. Mild enough so everyone can eat it and so flavorful that everyone finds it a taste supreme. Makes the finest sauce imaginable.

➤ **JONATHAN,** Solid Red. With its' crisp, juicy, snappy, flavor it brings real delight to the palate of young or old. Each bite calls for another, and so good for pies, sauce and salad. The Crown Prince of Apples.

➤ **MANTET.** A new, red, good eating, early summer apple from Canada. Very hardy.

➤ **MAUD.** Another new comer from Iowa State College that is "tops" for eating in late August. Beautiful red.

➤ **MELBA.** A mild, pleasantly flavored, good sized, early summer variety from Canada. Enticing aroma. Very hardy.

➤ **ORIOLE.** Looking for something extra special in an early apple? Very, very tasty and so beautiful. August. So hardy as it comes from Minnesota.

➤ **RIBSTON.** A fine old apple from England. September.

➤ **SHARON.** The aroma makes your mouth water. The flavor of this mild, richly flavored, crisp, juicy apple from Iowa State College will delight you from late September to mid-winter.

➤ **WEALTHY.** Remember the delicious sauce—the marvelous pies grandmother made? She was at her best with this great old apple. You can bring those memories into reality in your home—with WEALTHY. Very hardy.

➤ **YELLOW TRANSPARENT.** Apples in July? Sure with this one. Fresh biscuits and Yellow Transparent sauce. What a treat. Very hardy.
